Digital display and control

Unique COMBI-Rotor

The unique rotor design of the MyFuge 12 Plus eliminates the need to switch rotors (or use a separate centrifuge) when spinning both microtubes and PCR strips. The included, COMBI-Rotor allows for simultaneous centrifugation of up to 12 microtubes and/or 4 PCR strips.

In addition, the MyFuge 12 Plus features a large digital display with adjustable speed {up to 7,000 rpm) and a digital timer. With built in ref conversion, speed can be set/displayed in rpm or ref.

The Myfuge 12 Plus combines power with intuitive functionality making it the perfect companion in any laboratory.
